

sasrai-Movement's Appeal

Plant for Planet, Water for World, Environment for Entire

aimed at Habitable Planet

save a bit, reserve, preserve, conserve, rejuvenate

Resource : Water, electricity, gas, air, waste, time.....

Habitat : hill, pond, water body, wetland, river, sea.....

Labor : lacted mother, carrying mother, mother, children, disable, old.....

Expenses :

sasrai

global effort to the Humanity, Earth, Environment

Sustainable Augmentation, Solicited Restraint, Animated Integrity

Let's be a desired friend to each Creature

বাসযোগ্য বিশ্বের জন্যে.....

একটুকু বাঁচাই, আগলে রাখি, জাগিয়ে তুলি, সংরক্ষণ করি

স-সম্পদ : পানি, বিদ্যুৎ, গ্যাস, গাছ, বাতাস, সময়

া-আবাস : নদী, সমুদ্র, জলাশয়, পাহাড়, গাছ.....

শ-শ্রম : মা, সন্তবা মা, শিশু কোলে মা, শিশু, বৃদ্ধ, প্রতিবন্ধী.....

য়-ব্যয় :

সংশ্রয়

ভবিষ্যৎ প্রজন্মের জন্য সম্পদ ও পরিবেশ সংরক্ষণের বৈশ্বিক আন্দোলন

Sustainable Augmentation, Solicited Restraint, Animated Integrity

Confronting the Growing Threat of Climate Change

sasrai Commandment for Nature, Next Generation. Wish the Peace for Each, to ensure Rights for all - save a bit, reserve, preserve, rejuvenate and conserve resources

Let's achieve significant change in mindset, behavior and attitude combat Climate Crisis, Reduce Risk & Poverty, save Bio-diversity – Peace for Humanity.....as the way to achieve the desired goal - sasrai – work locally-serve globally, initiative local-outcome global.

AIMED AT SUSTAINABLE LIVING, ENVIRONMENTAL JUSTICE

Please Keep a hand written sasrai-Movement Poster in any discussion area

Let's have zeal to self tune in [sasrai-Movement](#) policy and be committed to save resource and reduce FOOD waste in our daily living - no matter how small it is. Please relentless to voice from each corner across the globe

To Combat the Climate Change and Global Warming Threat

- Please, save a drop of water daily, during all water related activities
- Please, plant at least a Native tree annually at own home or community
- Please, let's waste not single particle of food
- Please, let's waste not single particle of any resource
- Please, keep off electric appliances one minute daily
- Please, suspend travel by personal car once a day
- Please, keep a day in a week luxury free
- Please, do not throw away the waste wherever you like
- Please, No more junk food
- Please, Avoid one time
- Please, Buy items made from recycled materials
- Please, Prefer land phone instead of your cell
- Please, save one minute to think on Climate Change and Environment
- You Can Reduce CO2 Emissions, Plant Native Trees Worldwide

Let's we try to save one Taka/dollar/pound/yenfrom our daily use, consumption, expenditure, LUXURY combat the CLIMATE CHANGE, GLOBAL WARMING and the sequences.

"Those who have the privilege to know have the duty to act." -- Albert Einstein

The battle for freedom and justice never hopeless, but never finally won. Every morning we must wake up and ready to fight it again.

While saving a gallon here and there may not seem like much; bear in mind that every small action when multiplied millions of times can make a huge impact. For example, if every person in America reduced consumption by 100 gallons per year, and it's not that hard to do - that would

represent a saving of nearly 30 billion gallons of water annually. If everyone in the USA did the same that would translate to over 300 billion gallons! We really undervalue water when you consider humans can go for weeks without food, but only days without water. The amazing thing is, we only need a few litres (a gallon or so) a day through our food and directly to sustain ourselves. Added that, to maintain hygiene, we only need about 25 litres (6 gallons) a day in total. In developed countries, we currently use 500-800 litres (125 to 200 gallons) per day per person!

Bangladesh is the country most vulnerable to Climate Crisis. Minimum 50 million people will force to evacuate their home. Could you say where we will be settled? The Best Climate Practice should start each corner of globe with the theme 'HOW WE CAN GET OUR EACH BABY CARING TO EACH PARTICLE OF RESOURCE.'

<https://www.facebook.com/sasraiMovement.2004>

<https://www.facebook.com/photo.php?fbid=581141331908301&set=a.410051592350610.85835.410048385684264&type=1&theater> Obama

Climate Crisis already been started in Bangladesh. Women are fatal victim and farmer, fisherman are baffled. sasrai only the Path to save Bangladesh and Bangalee and the mother planet Earth. In absence of sasrai feeling, thinking and practicing among all across the globe not only Bangalee global community is highly threatened.

<https://www.facebook.com/photo.php?fbid=581141331908301&set=a.410051592350610.85835.410048385684264&type=1&theater> Obama

If we don't smarten up in consumption, scientists estimate that humans will consume twice as many resources as the planet can support by 2050. The consequences grow more and more severe as forests shrink, water becomes scarcer, arable lands diminish, and the level of greenhouse gases in the atmosphere approaches a deadly point of no return. Let's we try to save one Taka/dollar/pound/yenfrom our daily use, consumption, expenditure, LUXURY combat the CLIMATE CHANGE, GLOBAL WARMING and the sequences.

Path

- We must find the path getting Each Baby caring to Each particle of resource, every drop of water.
- Each Baby tuned to be caring to each particle of resource, every drop of water
- Let's find the path getting Each Baby caring to Each particle of resource, every drop of water.

The Best Climate Practice should be

- Getting each people caring the each particle of resources
- Each person irrespective sect, race, religion, ethnicity, caste, creed have mindset, "how much less consuming I could be"
- Street beggar to state driver must be climate sensible, resource responsible.
- Each person, family, nation have 'sasrai' feeling, thinking and practicing

Colette Seleagyi Buff Niknatha your are 100% correct.

The Best Climate Practice should start each corner of globe with the theme 'HOW WE CAN GET OUR EACH BABY CARING TO EACH PARTICLE OF RESOURCE.' sasrai Banner needed to be kept each community of the globe.

<https://www.facebook.com/media/set/?set=a.617068271644207.1073741831.131431783541194&type=3>

In the name of adaptation whatever we spent tune our policy maker fewer amounts could contribute more if we focus on mass people.

Person concerned own name and fame cannot bring truth in light. They have to adjust with so many factors. Let's do the best possible for me - save a bit, reserve, preserve, rejuvenate and conserve resources. I think bringing change in mindset among mass would be less costly than the time and resource spent for policy makers consent. We have to be decided which is better tuning policy maker or motivate mass.

To get the young as Climate Change activist
first step

01. Family should be the best learning center
02. Institution should be center for best climate practices

When parents and policy maker not tuned in reverse the devastating trend of the globe we cannot hope the young will be in desired path. Let's all senior first tuned in Climate Change Activist. I do hope our generation will offer us better earth.

To address Climate Threat we must get our each young caring to each particle of resource. Young could be tuned if her/his parents and education institution tuned to contribute for the habitable planet.

May the Creator of heaven and earth and all of man kind bless you for you caring ways and may you come to know him in a personal way.

Eid Mubarak Peaceful and Prosperous Eid for all

Wish the peace for each to ensure rights for all

save a bit, reserve, preserve, rejuvenate and conserve resources

Eid Mubarak - Peaceful and Prosperous Eid for all

Wish the peace for each to ensure rights for all

save a bit, reserve, preserve, rejuvenate and conserve resources

Climate change represents an unprecedented challenge in the history of the human race. In other ways, it demonstrates a truth that is depressingly old: the poor are always the ones to get hit worst in times of crisis, in New York City as much as anywhere else.

<https://www.facebook.com/photo.php?fbid=532999326722502&set=a.410051592350610.85835.410048385684264&type=1&theater>

The central theme for Holy Ramadan is drawing out from the Slavery to the Consumption. We must stop the slavery to the commodity. The absolute truth for today's world is the careless consumption driving untenable production that driving changes in average temperatures and weather patterns that breeds Hotter World and that's the Hungry World. And hungry world will contribute hundreds of millions of desperate people. Desperate people do desperate things: They riot, they fight over food, they overthrow governments, and they mass migrate to more food-secure countries.

<https://www.facebook.com/photo.php?fbid=532999326722502&set=a.410051592350610.85835.410048385684264&type=1&theater>

Climate change and extreme weather disasters were the main drivers of human displacement worldwide year 2012, with Hurricane Sandy accounting for most of the forced migration in the United States, according to a report released Monday. The devastating East Coast storm affected 24 states, forcing 776,000 people out of their homes, the Internal Displacement Monitoring Centre said in its **report**. Wildfires in the West and Hurricane Isaac also contributed to displacement, the report noted.

“The USA was among the ten countries worldwide with the highest displacement levels in 2012. Months before Hurricane Sandy, Hurricane Isaac displaced 60,000 people in August. ... Widespread forest fires forced over 39,000 people to evacuate their homes,” the report said. Sandy amounted to the world’s third largest displacement event last year, according to the report. It followed on the heels of a massive flood in northeast India and flood and typhoon incidents in China.

In all, Sandy cost an estimated \$71 billion of damage in the United States, the report noted. Thousands still have not returned home, with the state of New Jersey estimating 39,000 families remain displaced. The report said climate- and weather-related incidents accounted for 98 percent of global displacement from disasters last year.

Climate scientists have avoided connecting individual extreme weather events to climate change, instead arguing that its effects — such as warmer waters and higher sea levels — intensify storms. Still, Democrats and President Obama have invoked Hurricane Sandy, wildfires and widespread drought in calls to address climate change.

sasai believe in Climate Justice and urge to all across the Globe - Each individual, family, community, nation must have the Position to say we all **Street Beggar to State Driver** are Resource Responsible, Climate Sensible and Development Policy is Climate Compatible. We like to keep our children in destruction warning free. Each citizen across the globe must say I am the follower of sasrai – never abuse single particle of food or any resource. We are self asking in every step ‘HOW MUCH LESS CONSUMING I COULD BE.’ Let's we try to save one Taka/dollar/pound/yenfrom our daily use, consumption, expenditure, LUXURY combat the CLIMATE CHANGE, GLOBAL WARMING and the sequences.

<http://www.facebook.com/sasaiMovement.2004>

Magnitude of sasrai Presentation among school children [Bangladesh]
Benefit of sasrai Presentation could be counted following way [assuming institution has total 500 person including student, teacher and staff]

After our presentation if each of them change face wash behavior 'Tape to Mug' per person 3 liter in one time if we consider 5 time for each 15 liter for each. If those entire participant disseminate message other member and each family has five members then per family water save 75 liter. If it happened 500 families 375000 liter simply change in face wash behaviors. If it happened during brushing, hand washing, shaving, bathing, cloth washing amount will be far more. Considering present market price 37500 liter water @TK10 is 375000. If we able cover 100 school amount will go 37 lakhs 50 thousand just for face wash saving.

If it is happened each and every school of the city and all social media and leader support the message we believe our each student shall be able to save including other as follows
[for one school]

01. Per capita 1 minute electricity means 500 minute including family 2500 minute
02. Gas in two burner per family 1000minute
03. Avoiding fast food per family 20 equal to 10 thousand
04. Avoiding rickshaw one way 20 taka = 10 thousand
05. Avoiding unnecessary mobile call 10 taka = 5 thousand
06. Stop throwing solid waste -----
07. Avoiding unwise celebration cost per family 2000 = 10 lakhs
08. Avoiding private car once a weak
09. Planning private car use as for example school, shopping, kitchen marketing
10. Avoiding health hazardous soft drink
11. Avoiding luxury hotel/restaurants
12. Avoiding food wastage
13. Avoiding keep electric appliances stand by
14. Every roof, balcony with vegetable and medicinal plant

According to the United Nations, the 2004 Indian Ocean tsunami displaced 2.2 million people in 12 countries. In Bangladesh, 4.4 million people were displaced by Cyclone Sidr and floods in 2007, estimates the world body. And an estimated additional 200 million people will be displaced due to climate change and natural disaster by 2050, according to Refugees International.

Subject: Spread sasrai-Movement across the globe aimed at habitable earth

Dear Madam/Sir

Greetings from **sasai-Movement** that works voluntarily since 2004 across the globe aimed at promote prudent and sustainable consumption and conservation, optimum use and reduce the abuse of resources. sasrai target to animate, activate each individual, family, community, institution, organization to combat Climate Change, global warming, food, fuel and water security, poverty, disaster, waste, ecosystem and biodiversity, reverse the devastating trend of globe. Road map towards the implementation of the United Nations Millennium Declaration - sasrai brings into focus Six MDGs, 09 time-bound targets and 31 quantitative indicators.

USA president in **recent speech in Berlin has said the global threat of our time severe storms, Famine and floods, Coastlines vanish, Oceans rise and Climate change.** UN Secretary-General said climate change "is a humanitarian issue, a development issue, and an issue of security and stability."

A new report from the International Energy Agency says we are headed toward an increase in global temperatures of 6.5 °F to 9.5 °F, most of it during the lives of young people alive today. We must stop this undesired trend. And I do believe we never desire such situation for our young daughter and son.

Our Bangladesh identified as the most vulnerable to climate threat. Minimum 50 million people will force to evacuate their home. And 200 million people will be displaced due to climate change and natural disaster by 2050, according to Refugees International. Could we ponder how, where those will be settled? We must get each person caring to the each particle of food, resource.

The absolute truth for today's world the careless consumption driving untenable production that driving changes in average temperatures and weather patterns that breeds Hotter World and that's the Hungry World. And hungry world will contribute **hundreds of millions of desperate people. Desperate people do desperate things: They riot, they fight over food, they overthrow governments, and they mass migrate to more food-secure countries.**

We must have a mission to bridle on consumption across the globe that needs significant change in mindset among all, 'save a bit, reserve, preserve, rejuvenate and conserve resources.' sasrai only the path to attain the target. In absence of sasrai feeling, thinking and practice we can't offer a habitable earth for our next generation.

sasrai Volunteer demand your kind contemplation to spread sasrai across the globe effectively.

To

Sharon Holthuijsen
Public Information Service, Government of the Netherlands

Dear Madam/Sir
Greetings

Thanks for your answer. Unfortunately you haven't given here the email ID to write on. Please do this and help me. I am not sure why you are afraid to forward it to the letter to the respective desk.

I hope your kind attention and cooperation first to get the Email ID of President/Prime Minister. Secondly I do believe you could forward my letter that written earlier to the Prime minister to spread the **sasai-Movement** across the globe.

As far as I am informed in some back dated third world countries it is problem to forward letter President or Prime Minister by a junior official. Being a develop country I think you have not such a undue/unfair thought and behavior.

Please do forward the letter to the King, Queen, President, Prime Minister, Minister and all concern. **sasai-Movement** is a voluntary work and I do it voluntarily for the sake of me, you and humanity, earth and environment.

You plz be informed

Absolute truth for today's world careless consumption driving untenable production that driving changes in temperature and weather patterns and that's Hotter, Hungry World. Hungry world will contribute millions of desperate people. Desperate people do desperate things: **They riot, they fight over food, they overthrow governments, and the mass migrate to food-secure countries.**

Our country Bangladesh identified as most vulnerable to climate threat. Climate Study Predicts Flood-prone Future For Major U.S. Cities

More than 1,700 American cities and towns – including Boston, New York, Miami, New Orleans, San Francisco, Sacramento and Seattle – will have some 25% of their populations living below the high-water mark by the end of this century if the current global warming trend continues, a new climate change study has found. [The same danger, of course, exists for coastal cities around the world.]

I do believe you all in Public Information Service, Government of the Netherlands would realize the matter and would uphold needed action.

Hope the best, much love, stay safe.

To
The Secretary General
United Nations

The absolute truth for today's world the careless consumption driving untenable production that driving changes in average temperatures and weather patterns that breeds Hotter World and that's the Hungry World. And hungry world will contribute **hundreds of millions of desperate people. Desperate people do desperate things: They riot, they fight over food, they overthrow governments, and they mass migrate to more food-secure countries.**

We must have a mission to bridle on consumption across the globe that needs significant change in mindset among all, 'save a bit, reserve, preserve, rejuvenate and conserve resources.' sasrai only the path to attain the target. In absence of sasrai feeling, thinking and practice we can't offer a habitable earth for our next generation.

sasrai Volunteer demand your kind contemplation to spread sasrai across the globe effectively.

Regards

SM Farid Uddin Akhter, Secretariat In-charge

The case studies highlight a number of potential responses for ensuring greater resilience to climate variability:

1. The importance of strong, accountable, participatory and effective local governance;
2. Equitable management of and access to natural resources;
3. Climate-sensitive alternative livelihoods;
4. Fair access to credit; and
5. Peaceful and safe management of migration.

We're using more resources than the planet can produce and replenish. In fact, every year we humans consume the equivalent of 1.5 planets' worth of resources! In a developed nation like the US, chances are you're using four or five planets' worth or more.

If we don't smarten up in consumption, scientists estimate that humans will consume twice as many resources as the planet can support by 2050. The consequences grow more and more severe as forests shrink, water becomes scarcer, arable lands diminish, and the level of greenhouse gases in the atmosphere approaches a deadly point of no return.

Let's we try to save one Taka/dollar/pound/yenfrom our daily use, consumption, expenditure, LUXURY combat the CLIMATE CHANGE, GLOBAL WARMING and the sequences.
<http://www.facebook.com/sasraiMovement.2004>

Governance isn't it utopia on present world. Could we find anyone believe in, when possess power? Governance cannot ensure needed action. Presently none could show in any country that the governance we talk. I think we should stop this hypothetical word or wouldn't be achieved in any society of globe. Let's have initiative bring significant change in mindset among all that aimed at habitable earth - **save a bit, reserve, preserve, rejuvenate and conserve resources**

Wish the peace for each to ensure rights for all

save a bit, reserve, preserve, rejuvenate and conserve resources

sasrai **ONLY THE PATH TO SAVE MOTHER PLANET EARTH, NATURE. It's only the path to Eliminate Racial Discrimination - End violence against WOMEN and CHILDREN. sasrai only the path to end POVERTY, VULNEARABILITY, HUNGER, DISASTER, CLIMATE Threat. Each second, minute, hour day needed to be spent considering earth, environment and humanity.**

<https://www.facebook.com/photo.php?fbid=532999326722502&set=a.410051592350610.85835.410048385684264&type=1&theater>

!!!INTERNATIONAL DAY OF FRIENDSHIP!!!

DO WE BELIEVE IT? MEAN IT? IF IT IS THEN ONLY THE PATH IS sasrai **ONLY THE PATH TO SAVE MOTHER PLANET EARTH, NATURE.**
