USA mass shooting at Sandy Hook Elementary School, on December 17 in Newtown, Connecticut teaches global community, WE MUST "inspire us to be better, more compassionate and caring toward other people." Central cause of Climate Threat is our Consumption – that breeds unsustainable production – that breeds Hooter World and that's the Hungry World, Disastrous world and World of stress. If we feel the need of Warning Free World for our next generation we must bridle on our consumption. We must accept - 'save a bit, reserve, preserve, rejuvenate and conserve resources.' In absence of sasrai feeling, thinking and practice we can't offer a habitable earth for our next generation.

"Nature does not discriminate between a rich super power or a poor nation. We must stop being a slave to consumption," says our new ClimateChamp SM Farid Uddin Akhter <http://ecowatch.com/2013/colorado-flooding-triggers-more-oil-and-gas-spills/>

To successfully reduce the risks posed by climate change, we will need the full engagement of everyone – including the scientists and meteorologists who have their fingers on the pulse of our planet. We must need street driver to state driver who is responsible to adopt green behavior.

<https://www.facebook.com/photo.php?fbid=510911668934070&set=t.100000460382667&type=1&theater>  
<https://www.facebook.com/photo.php?fbid=489719931082898&set=t.100000460382667&type=1&theater>

To manage disaster risk means empower people economically. Economical empowerment could be ensure for mass people through desired production, specially agricultural production. And that might be possible when each person caring to each particle of resource, each drop of water. Present planet desperately need massive program that contribute to get each person resource responsible and climate sensible. In absence this we cannot hope any better result.

### Canada Flood

Let's find the way to REDUCE UNDERGROUND WATER EXTRACTION. We must find the way -To GET EACH Children and Youth EACH DROP OF WATER CARING?

## UNEP Song

<http://www.facebook.com/photo.php?fbid=10151749377040712&set=a.10151708957710712.1073741829.287683225711&type=1&theater>

## No need to be believer of Climate Change but MUST BELIEVE IN EACH PARTICLE OF RESOURCE CARING.

<https://www.facebook.com/photo.php?fbid=614778925214010&set=gm.10151694385922402&type=1&theater>

### **"The world is heading for irreversible and potential catastrophic climate change", Nature never bother super power or poorer - demand absolute Care**

Humanity in need of Climate Responsible Community, Climate Compatible Development  
Nature Rebellious - Look at repeated threat/attack from Nature - Australia, Africa, NewZealand, Brazil, Europe, Pakistan, Japan, Iran, Myanmar, Thailand, Russia, Indonesia and USA. Nature never bother super power or poorer - demand absolute Care.

<https://www.facebook.com/photo.php?fbid=10151701864287708&set=a.136077452707.110998.12185972707&type=1&theater>

<https://www.facebook.com/photo.php?fbid=10151643936632708&set=a.136077452707.110998.12185972707&type=1&theater>

Let's find the way to REDUCE UNDERGROUND WATER EXTRACTION. HOW WE CAN GET EACH PERSON EACH DROP OF WATER CARING?

<https://www.facebook.com/photo.php?fbid=10152097905405934&set=a.68205320933.96102.22234040933&type=1&theater>

HOW WE CAN GET OUR CHILDREN - CLIMATE SENSIBLE, RESOURCE RESPONSIBLE

<http://www.facebook.com/photo.php?fbid=10151762110650712&set=a.10151708957710712.1073741829.287683225711&type=1&theater>

HOW WE CAN GET OUR EACH BABY EACH PARTICLE OF RESOURCE RESPONSIBLE?

HOW EACH MOMENT COULD BE ENVIRONMENT CONSIDERING

<https://www.facebook.com/photo.php?fbid=607248502633859&set=oa.10151676064022402&type=1&theater>

HOW WE CAN GET OUR EACH BABY EACH DROP OF WATER CARING, LESS WASTING?

<https://www.facebook.com/photo.php?fbid=10201282007869495&set=a.4122626461257.2174583.1151201757&type=1&theater>

The Best Climate Practice should be

- getting each people caring to the each particle of resources
- each person irrespective of sect, race, religion, ethnicity, caste, creed have mindset, "how much less consuming I could be"
- street beggar to state driver must be climate sensible, resource responsible.
- each person, family, nation have `sasrai' feeling, thinking and practicing

<http://www.facebook.com/sasraiMovement.2004>

The Best Climate Practice should start each corner of globe with the theme `HOW WE CAN GET OUR EACH BABY CARING TO EACH PARTICLE OF RESOURCE.'

<http://www.facebook.com/sasraiMovement.2004>

Best Climate Practices is: <http://www.bestclimatepractices.org/Projects.aspx>

Behavior Change Communication

To get the desired result need efficient field facilitator. Field Personnel/Front line forces are highly demotivated being low paid. Donors and NGOs are careless about the rights of front line staff. Not only BCC in WASH sector total development initiative miserably failed in every sector. NGO owner and donor must ponder on the point.

This is really misfortune for us WHEN WE HAVE MUCH MONEY WE ARE LITTLE BIT CRIPPLE TO IDENTIFY THE RESOURCES APPROPRIATELY and think Properly. Each and every person got instinctive knowledge. Prior to international Training send all young professional to their own

village and ask them learn how poorest family survive there. Ask them to live with poor farmer or woodcutter lady, learn them how she passes the day finally ask them to write how much resource lady utilizes for per person survival.

Finally you collect all the paper from young professional. And send it to other group correct it. I do believe it might make very good learning for the young professional if they really believe in natural resource management. Last 28 years it is observed international training in maximum place just abuses of resources. Above all it creates dissatisfaction among the staff of local NGO.

#### Food Waste and Pope

[http://www.upi.com/Health\\_News/2013/06/06/Pope-Wasting-food-is-like-stealing-from-the-poor/UPI-46851370495820/](http://www.upi.com/Health_News/2013/06/06/Pope-Wasting-food-is-like-stealing-from-the-poor/UPI-46851370495820/)

#### WORLD ENVIRONMENT DAY 2013

Environment stands for equality that ensures equal Nurturing for all. That demand equal Voice and Respect for all. Each and everyone uphold moral, trustful and endearing to other. Optimum utilization of resources viz reduce, reuses, repair, recycle and replenishment.

<https://www.facebook.com/photo.php?fbid=10201282007869495&set=a.4122626461257.2174583.1151201757&type=1&theater>  
<https://www.facebook.com/photo.php?fbid=567307053291729&set=a.410051592350610.85835.410048385684264&type=1&theater>

Great. very simple, but effective tips. Youth are the harbingers of change with a little focus and awareness. Use mug instead of running tap. Use bucket and mug in place of hose pipe for car / scooter washing. use bucket in place of shower or tub for bathing. If we use quarter-turn or half-turn taps, we can save precious water. Similarly, if we use dual flush cistern also. If we create sensitivity in people in usage of water, it will go a long way in tackling wastage, scarcity, unequal distribution and arresting pollution of water. Youth, women and children are the most powerful channels for sustainable use of water.

#### WED 2013 wish the Rights and Peace for Each

The present planet desperately needs - sasrai Leader/environment leader/nature lover/resource lover. Nature Rebellious - Look at repeated threat/attack from Nature - Australia, Africa, NewZealand, Brazil, Pakistan, Japan, Iran, Myanmar, Thailand, Russia, Indonesia, USA and Europe. Nature never bother super power or poorer - demand absolute Care.

<http://www.facebook.com/photo.php?fbid=609781155713892&set=a.245695032122508.68177.100000460382667&type=1&theater>

<https://www.facebook.com/photo.php?fbid=290540291080121&set=a.221718344628983.57400.221716324629185&type=1&theater>

32 million people in 82 countries were displaced by climate - and weather-related disasters in 2012, nearly twice as many as in 2011, according to the Internal Displacement Monitoring Centre. This number is expected to increase as climate change intensifies.

<https://www.facebook.com/photo.php?fbid=130552243804546&set=o.8450962401&type=1&theater>

**Food Waste:** There are so many things we can do to help stop food waste. We can plan our meals, start backyard composting, encourage our cities to start curbside recycling pickups for food scraps, help the Food Rescue Organizations, and be more conscious about what we get, and what we throw away. Teens all across America can help stop world hunger, and stop the damaging Methane gases released from the food waste. Throwing it away isn't the answer.

## **"War on Food Waste" RESONANCE AND MAGNIFICENT ACHIEVEMENT OF sasrai-Movement**

This is a promising and stirring message for the sasrai-Movement's volunteer across the globe international community getting tuned in sasrai theme – **"wish the Peace for Each, Rights for all - save a bit, reserve, preserve, rejuvenate and conserve resources, no matter how small it is."** Since 2004 we voiced and waiting for this golden time intelligentsia, expert, researcher, professor, media, planner and people in power come to realize our theme and tuned to voiced same.

This is the primary triumph of sasrai theme -International Community Urged to Declare "War on Food Waste." We urged last 10 years bringing significant change in mindset among all ` save a bit, reserve, preserve, rejuvenate and conserve resources'. War can't contribute in peace need change in mindset.

sasai is an approach aims to bring significant change in mindset, attitude and behavior. Each individual across the globe must have feeling, thinking and practicing—we must save resources for our old age also for our next generation. sasrai is an appeal to all –let’s we practice sasrai living, be less consuming, be keen in as less as possible consumption. We must present a habitable earth to our next generation who haven’t exploited any resources from earth. Road map towards the implementation of the United Nations Millennium Declaration - sasrai brings into focus Six MDGs, 09 time-bound targets and 31 quantitative indicators.

<https://www.facebook.com/photo.php?fbid=535744979781270&set=a.410051592350610.85835.410048385684264&type=1&theater>

## **"The world is heading for irreversible and potential catastrophic climate change",**

The National Oceanic and Atmospheric Administration (NOAA) announced that 2012 was the hottest year on record for the United States. It was also the second most extreme, weather-wise, and nearly twice the average. NOAA confirmed that this pattern will worsen if climate change continues unabated.

Australia is baking under a record-breaking heat wave that is literally off the charts! The heat is so extreme that their Bureau of Meteorology had to add new colors to its weather chart to extend its previous maximum temperature range that had been capped at 50 degrees [122°F]!  
<http://ow.ly/gIatj>

IPS - Special Issue on COP18 Doha Climate Change Conference 29 Nov, Dec 07, 2012 - state that unsustainable human consumption and production systems are driving changes in average temperatures and weather patterns, "abnormal" is increasingly becoming the norm.

Since 2004 sasrai urging to all, every day to reverse the devastating trend of **Climate Change**. Central cause of Climate Threat is our Consumption - that breeds unsustainable production - and that breeds Hotter World and that is Hungry World, disastrous world. If we feel the need of Warning Free World for our next generation we must have bridle on our consumption. And since 2004 sasrai

appeal for that - 'HOW MUCH LESS CONSUMING I COULD BE.' In absence of sasrai feeling, thinking and practice we can't offer a habitable earth for our next generation.

"The best friend of earth of man is the tree. When we use the tree respectfully and economically, we have one of the greatest resources on the earth." What do you think about Frank Lloyd Wright's conservation quote?

The absolute truth for today's world the careless consumption driving untenable production that driving changes in average temperatures and weather patterns that breeds Hotter World and that's the Hungry World. Major responsibilities of the global community right now - Control on Consumption. Since 2004 sasrai appeal to all save a bit, reserve, preserve, rejuvenate and conserve resources. Let's achieve significant change in mindset, behavior and attitude combat Climate Crisis, Reduce Risk & Poverty, save Bio-diversity - Peace for Humanity.

<http://climaterealityproject.org/2013/01/16/the-face-of-climate-change-in-america/#comment-78197>

Climate behavior is regularly irregular and erratic due to unsustainable human consumption and production systems. None of we are capable to bridle on production system but we capable enough to bridle on our own consumption behavior. Since 2004 sasrai appeal to all across the globe Please relentless to voice from each corner across the globe save a bit, reserve, preserve, rejuvenate and conserve resources. Let's we try to save one Taka/dollar/pound/yen .....from our daily use, consumption, expenditure, LUXURY combat the CLIMATE CHANGE, GLOBAL WARMING and the sequences. <http://www.facebook.com/sasraiMovement.2004>

Do you know? People in Asia and the Pacific are four times more likely to be affected by natural disaster than in Africa and 25 times more than in Europe or North America?

## Role of Individual

sasrai believe in Climate Justice and urge to all across the Globe

Each individual, family, community, nation must have the Position to say we all street beggar to state driver are Resource Responsible, Climate Sensible and Development Policy is Climate Compatible. We like to keep our children in destruction warning free. Each citizen across the globe must say - I am the follower of sasrai - never abuse single particle of food or any resource. We are self asking in every step 'HOW MUCH LESS CONSUMING I COULD BE.' Let's we try to save one Taka/dollar/pound/yen .....from our daily use, consumption, expenditure, LUXURY combat the CLIMATE CHANGE, GLOBAL WARMING and the sequences.

<http://www.facebook.com/photo.php?fbid=527666977246944&set=at.489315351082107.125383.489312117749097.1602257923&type=1&theater>

<http://www.facebook.com/photo.php?fbid=209233022547997&set=a.124327277705239.19911.116891208448846&type=1&theater>

<http://www.facebook.com/photo.php?fbid=466410076714329&set=a.273692799319392.65567.259965227358816&type=1&theater>

<https://www.facebook.com/photo.php?fbid=481468041875631&set=o.287683225711&type=1&theater>

Mankind's irrational destruction of nature bothers me a lot. Mankind is slowly committing suicide—or not so slowly: each day it accelerates—producing all kinds of wastes: corporal, industrial, atomic, poisoning the earth, the sea and the air. He destroys the very environment that gives him sustenance. Centuries and centuries of civilization to arrive at this? What a piece of work is man! No other animal would be so stupid. Plagues of locusts are sporadic, they have a limit sasrai Urge

a. Live simply that others may simply live b. Only when the last tree has been cut down, / Only when the last river has been poisoned, / Only when the last fish has been caught, / Only then will you find that money cannot be eaten. c. Morality, civility, honesty, simplicity, sincerity triumph ultimately

<https://www.facebook.com/photo.php?fbid=10151345308092708&set=a.136077452707.110998.12185972707&type=1&theater>

sasrai is an approach aims to bring significant change in mindset, attitude and behavior. Each individual across the globe must in a feeling, thinking and practicing—we must save resources for our old age also for our next generation. sasrai is an appeal to all -let's we practice sasrai living, be less consuming, be keen in as less as possible consumption. We must present a habitable earth to our next generation who haven't exploited any resources from earth. Road map towards the implementation of the United Nations Millennium Declaration - sasrai brings into focus Six MDGs, 09 time-bound targets and 31 quantitative indicators.

<http://www.facebook.com/photo.php?fbid=483973061625129&set=a.410051592350610.85835.410048385684264&type=1&theater>

"The world is heading for irreversible and potential catastrophic climate change", Since 2004 sasrai urging to all, every day to reverse the devastating trend of globe. Central cause of Climate Threat is our Consumption – that breeds unsustainable production – and that breeds Hotter World and that is Hungry World, disastrous world. If we feel the need of Warning Free World for our next generation we must have bridle on our consumption. And since 2004 sasrai appeal for that - 'HOW MUCH LESS CONSUMING I COULD BE.' In absence of sasrai feeling, thinking and practice we can't offer a habitable earth for our next generation.

<http://www.facebook.com/photo.php?fbid=495144943841274&set=a.410051592350610.85835.410048385684264&type=1&theater>

## GRAND ACHIEVEMENT OF sasrai-Movement

Dear Madam/Sir

Greetings from **sasrai-Movement** that works voluntarily since 2004 across the globe aimed at promote prudent and sustainable consumption and conservation, optimum use and reduce the abuse of resources. sasrai target to animate, activate each individual, family, community, institution, organization to combat Climate Change, global warming, food, fuel and water security, poverty, disaster, waste, ecosystem and biodiversity, reverse the devastating trend of globe. Road map towards the implementation of the United Nations Millennium Declaration - sasrai brings into focus Six MDGs, 09 time-bound targets and 31 quantitative indicators.

Please be informed today **May 26, 2013** Divisional Commissioner of Chittagong served letter to DCs and heads of education administration office to ensure MONTH LONG sasrai Banner hanging in observance of **World Environment Day 2013** in each government office and education institution. May be this is the first time in the history of Bangladesh government uphold and own the voluntary initiative.

We believe very soon our hon'able premier of Bangladesh Sheikh Hasina will do same - pass government order to keep sasrai-Movement banner in each government, non-government, business office and educational institution must keep a sasrai Banner yearlong that translate green action for each and every citizen irrespective of class, race, religion, cast, creed and ethnicity.

We do believe UNEP will initiate and UN shall take on resolution like hon'able premier Sheikh Hasina for the globe aimed at significant change in mindset among all, 'HOW MUCH LESS CONSUMING I COULD BE.'  
**sasrai ONLY THE PATH TO SAVE THE PLANET EARTH, ONLY THE PATH TO Eliminate Racial Discrimination, END VIOLENCE AGAINST WOMEN, CHILDREN or whatever we say. sasrai ONLY THE PATH TO END VULNEARABILITY, HUNGER, DISASTER, CLIMATE Threat. Each second, minute, hour day needed to be spent considering earth, environment and humanity.**

sasrai-Movement Volunteer waiting for that very golden moment target to peace for each rights for all – sustainable living, environmental justice.

Hope the best, much love.

### **Hurricane Sandy forced third-most people from homes worldwide in 2012**

<http://thehill.com/blogs/e2-wire/e2-wire/299289-hurricane-sandy-forced-third-most-people-from-homes-worldwide-in-2012>

Climate change and extreme weather disasters were the main drivers of human displacement worldwide last year, with Hurricane Sandy accounting for most of the forced migration in the United States, according to a report released Monday. The devastating East Coast storm affected 24 states, forcing 776,000 people out of their homes, the Internal Displacement Monitoring Centre said in its **report**. Wildfires in the West and Hurricane Isaac also contributed to displacement, the report noted.

“The USA was among the ten countries worldwide with the highest displacement levels in 2012. Months before Hurricane Sandy, Hurricane Isaac displaced 60,000 people in August. ... Widespread forest fires forced over 39,000 people to evacuate their homes,” the report said. Sandy amounted to the world’s third largest displacement event last year, according to the report. It followed on the heels of a massive flood in northeast India and flood and typhoon incidents in China.

In all, Sandy cost an estimated \$71 billion of damage in the United States, the report noted. Thousands still have not returned home, with the state of New Jersey estimating 39,000 families remain displaced. The report said climate- and weather-related incidents accounted for 98 percent of global displacement from disasters last year.

Climate scientists have avoided connecting individual extreme weather events to climate change, instead arguing that its effects — such as warmer waters and higher sea levels — intensify storms. Still, Democrats and President Obama have invoked Hurricane Sandy, wildfires and widespread drought in calls to address climate change.

Legislation is unlikely amid a Republican-controlled House and a Senate timid on climate issues. That prompted Obama to say in his February State of the Union speech that he would go it alone on climate through executive action if necessary.

## Meeting On

### World Environment Day 2013 Observation Program

Venue: Chittagong Divisional Commissioner office conference room

Participant: 25 (different government office chief/representative)

- sasrai Poster Distribution among the participants
- sasrai message explain to participant

### Dear Volunteer and well wisher of sasrai-MOvement

Please be informed May 22, 2013 is a day of our achievement, Government of Bangladesh WORLDENVIRONMENT DAY OBSERVATION MEETING in Chittagong Division agreed in a fundamental point that WED theme needed to be translated into action for mass people action, function and participation. House certified and the chair agreed on homing sasrai Banner as follows.

#### **01. World Environment Day rally will hold sasrai Banner**

#### **02. sasrai Banner Hanged in each government office**

#### **03. sasrai Banner Hanged in Educational Institution**

<http://www.facebook.com/photo.php?fbid=562061643816270&set=a.410051592350610.85835.410048385684264&type=1&theater>

<https://www.facebook.com/photo.php?fbid=487463434660380&set=a.109779682428759.15112.100001901845993&type=1&theater>

**Please, save a drop of water daily, during all water related activities**

**Please, plant at least a Native tree annually at own home or community**

**Please, let's not waste single particle of food**

<http://www.facebook.com/photo.php?fbid=562061643816270&set=a.410051592350610.85835.410048385684264&type=1&theater>

The impact of food waste is not just financial. Environmentally, food waste leads to wasteful use of chemicals such as fertilizers and pesticides; more fuel used for transportation; and more rotting food, creating more methane – one of the most harmful greenhouse gases that contributes to climate change. Methane is 23 times more potent than CO<sub>2</sub> as a greenhouse gas. The vast amount of food going to landfills makes a significant contribution to global warming.

- Roughly one third of the food produced in the world for human consumption every year — approximately 1.3 billion tonnes — gets lost or wasted.
- Every year, consumers in rich countries waste almost as much food (222 million tonnes) as the entire net food production of sub-Saharan Africa (230 million tonnes).
- The amount of food lost or wasted every year is equivalent to more than half of the world's annual cereals crop (2.3 billion tonnes in 2009/2010).
- Food loss and waste also amount to a major squandering of resources, including water, land, energy, labour and capital and needlessly produce greenhouse gas emissions, contributing to global warming and climate change.
- In developing countries food waste and losses occur mainly at early stages of the food value chain and can be traced back to financial, managerial and technical constraints in harvesting techniques as well as storage –and cooling facilities. Thus, a strengthening of the supply chain through the support farmers and investments in infrastructure, transportation, as well as in an expansion of the food –and packaging industry could help to reduce the amount of food loss and waste.
- In medium- and high-income countries food is wasted and lost mainly at later stages in the supply chain. Differing from the situation in developing countries, the behavior of consumers plays a huge part in industrialized countries. Moreover, the study identified a lacking coordination between actors in the supply chain as a contributing factor. Farmer-buyer agreements can be helpful to increase the level of coordination. Additionally, raising awareness among industries, retailers and consumers as well as finding beneficial use for save food that is presently thrown away are useful measures to decrease the amount of losses and waste.
- In the United States 30% of all food, worth US\$48.3 billion (€32.5 billion), is thrown away each year. It is estimated that about half of the water used to produce this food also goes to waste, since agriculture is the largest human use of water. (Jones, 2004 cited in Lundqvist et al., 2008)
- United Kingdom households waste an estimated 6.7 million tonnes of food every year, around one third of the 21.7 million tonnes purchased. This means that approximately 32% of all food purchased per year is not eaten. Most of this (5.9 million tonnes or 88%) is currently collected by local authorities. Most of the food waste (4.1 million tonnes or 61%) is avoidable and could have been eaten had it been better managed (WRAP, 2008; Knight and Davis, 2007).
- In the USA, organic waste is the second highest component of landfills, which are the largest source of methane emissions.

<http://www.unep.org/wed/quickfacts/#sthash.jztpa0OA.dpuf>

"The world is heading for irreversible and potential catastrophic climate change", Central cause of Climate Threat is our Consumption - that breeds unsustainable production - and that breeds Hotter World and that is Hungry World. If we feel the need of Warning Free World for our next generation we must have bridle on our consumption. And since 2004 sasrai appeal for that - 'HOW MUCH LESS CONSUMING I COULD BE.' In absence of sasrai feeling, thinking and practice we can't offer a habitable earth for our next generation.

#### **The relation between consumption and water use**

"The interest in the water footprint is rooted in the recognition that human impacts on freshwater systems can ultimately be linked to human consumption, and that issues like water shortages and pollution can be better understood and addressed by considering production and supply chains as a whole," says Professor Arjen Y. Hoekstra, creator of the water footprint concept.

"Water problems are often closely tied to the structure of the global economy. Many countries have significantly externalized their water footprint, importing water-intensive goods from elsewhere. This puts pressure on the water resources in the exporting regions, where too often mechanisms for wise water governance and conservation are lacking. Not only governments, but also consumers, businesses and civil society communities can play a role in achieving a better management of water resources."

#### **Some facts and figures**

- The production of one kilogram of **beef** requires 15 thousand litres of water (93% green, 4% blue, 3% grey water footprint). There is a huge variation around this global average. The precise footprint of a piece of beef depends on factors such as the type of production system and the composition and origin of the feed of the cow.
- The water footprint of a 150-gram **soy burger** produced in the Netherlands is about 160 litres. A beef burger from the same country costs about 1000 litres.
- The water footprint of **Chinese consumption** is about 1070 cubic meter per year per capita. About 10% of the Chinese water footprint falls outside China.
- **Japan** with a footprint of 1380 cubic meter per year per capita, has about 77% of its total water footprint outside the borders of the country.
- The water footprint of **US citizens** is 2840 cubic meter per year per capita. About 20% of this water footprint is external. The largest external water footprint of US consumption lies in the Yangtze river basin, China.
- The **global water footprint** in the period 1996-2005 was 9087 Gm<sup>3</sup>/yr (74% green, 11% blue, 15% grey). Agricultural production contributes 92% to this total footprint.
- **Water scarcity** affects over 2.7 billion people for at least one month each year.

Today, cotton is the most important natural fibre used in the textile industries worldwide, amounting to 40% of the textile production. The consumption of a cotton product is connected to a chain of impacts on the water resources in the countries where cotton is grown and processed – mainly dry regions. These impacts of cotton production on the environment are easily visible and have different faces. On the one hand there are the effects of water depletion. On the other, the effects on water quality. Global consumption of cotton products requires 256 Gm<sup>3</sup> of water per year, out of which about 42% is blue water, 39% green water and 19% dilution water.

The impacts on water are typically cross-border. About 84% of the water footprint of cotton consumption in the EU25 region is located outside Europe, with major impacts particularly in India and Uzbekistan. Cotton consumers have little incentive to take responsibility for the impacts on remote water systems due to the general lack of proper water pricing mechanisms or other ways of transmitting production information.

### +Social Good

Wish the Peace for each, to ensure Rights for all save a bit, reserve, preserve, rejuvenate and conserve resources. Planet desperately needs - sasrai Leader, RESOURCE/nature lover. Nature Rebellious - repeated attack - Australia, Africa, NewZealand, Brazil, Pakistan, Japan, Iran, Myanmar, Thailand, Russia, Indonesia, USA and Europe. Nature never bother super power or poorer - demand absolute Care. sasrai ONLY THE PATH TO SAVE MOTHER PLANET EARTH, NATURE, END HUNGER, DISASTER, VIOLENCE AGAINST WOMEN, CHILDREN. Street beggar to state driver - Must have feeling `HOW MUCH LESS CONSUMING I COULD BE`.

Please voice - save a drop of water daily, during all water related activities, plant at least a Native tree annually at own home or community, waste not single particle of resource

Let's try to save one Taka/dollar/pound/yen .....from our daily use, consumption, expenditure, LUXURY combat the CLIMATE CHANGE, GLOBAL WARMING and the sequences.
