How Can You Stop Climate Change?

<http://www.climate-change-guide.com/stop-climate-change.html>

[http://bangladesh.exams.britishcouncil.org/post\\_result\\_edexcel.php](http://bangladesh.exams.britishcouncil.org/post_result_edexcel.php)

Absolute truth for today's world careless consumption driving untenable production that driving changes in temperature and weather patterns and that's the Hotter and Hungry World. Hungry world will contribute millions of desperate people. Desperate people do desperate things: They riot, they fight over food, they overthrow governments, and the mass migrate to food-secure countries.

<https://www.facebook.com/photo.php?fbid=1431708857084991&set=a.1376736299248914.1073741828.100007376703347&type=1&theater>

We must get Each Child Caring to Each Particle of Food & Resources

Wish the peace for each to ensure rights for all

save a bit, reserve, preserve, rejuvenate and conserve resources

sasai Achievement

Since Inception `sasrai` prized by all sector people. Street beggar to state driver each contribute here by her/his nature caring behavior. This need simple change in mindset, `how much less consuming I could be' or `live simple that other could live simply.' By the last 10 years journey `sasrai' earned much reputation and felicitation people from all works of life across the globe. We believe UNEP World Environment Day theme of 2013 Think Eat Save is the resonance of sasrai-Movement.

- a. Honorable Prime minister of Bangladesh address sasrai in her different speech
- b. sasrai volunteer SM Farid Uddin Akhter declared as climate Champ DW global idea.
- c. Chittagong Higher Secondary Education Board Chairman permitted conduct sasrai dialogue among the student of 1400 instituton (1200 school & 200 college).
- d. sasrai Partnership with world lead environmental organization, movement, institution and initiative viz UNEP, Climate Reality, Earth Day network, 350.org, Food think tank etc.
- e. We are linked with innumerable individual, institution and initiative across the globe.
- f. Many initiative across the globe follow sasrai theme and design their different slogan like "Shorter Shower, Greener Lifestyle" "Combat Climate Change, Live a Low-Carbon life" etc.

Nation remember the intellectuals those brutally killed by Albadar, Alshams, Razakar WAR CRIMINAL in collaboration of the Pakistani occupation forces on December 14, 1971, just two days ahead of the nation's Victory Day.

<https://www.facebook.com/photo.php?fbid=710750955616806&set=gm.10152089108302402&type=1&theater>

Capitalism is basically a system where everything is for sale, and the more money you have, the more you can get. And, in particular, that's true of freedom. Freedom is one of the commodities

that is for sale, and if you are affluent, you can have a lot of it. It shows up in all sorts of ways. It shows up if you get in trouble with the law, let's say, or in any aspect of life it shows up.

Governments don't want well informed well educated people capable of critical thinking. That is against their interests. They want obedient workers, people who are just smart enough to run the machines and do the paper work. And dumb enough to passively accept it. George Carlin

"Shorter Shower, Greener Lifestyle" "Combat Climate Change, Live a Low-Carbon life"

Devastation – Philippines, Washington, Illinois

**"The world is heading for irreversible and potential catastrophic climate change",**

**Nature never bother super power or poorer - demand absolute Care**

Humanity in need of Climate Responsible Community, Climate Compatible Development

<https://www.facebook.com/photo.php?fbid=643995015622932&set=a.410051592350610.85835.410048385684264&type=1&theater>

<http://sg.news.yahoo.com/video/tornado-destroys-washington-illinois-223536879.html>

[http://www.huffingtonpost.com/2013/11/18/washington-tornado-photos\\_n\\_4296752.html](http://www.huffingtonpost.com/2013/11/18/washington-tornado-photos_n_4296752.html)

"To anyone who continues to deny the reality that is climate change, I dare you to get off your ivory tower and away from the comfort of your armchair. I dare you to go to the islands of the Pacific, the islands of the Caribbean and the islands of the Indian Ocean and see the impacts of rising sea levels ... to the hills of Central America that confront similar monstrous hurricanes, to the vast savannas of Africa where climate change has likewise become a matter of life and death as food and water becomes scarce ... And if that is not enough, you may want to pay a visit to the Philippines right now."

<https://www.facebook.com/photo.php?fbid=685607601464615&set=gm.10152014783317402&type=1&theater>

This is a terrific message for global community definitely for the power holder and property holder or money maker. People are getting frustrated and pessimistic observing the total situation of the globe - where poverty increasing and climate threatening incessantly. Mass people are in highest most threat of survival. Let's we all be caring to each as maximum as possible.

<https://www.facebook.com/photo.php?fbid=532999326722502&set=a.410051592350610.85835.410048385684264&type=1&theater>

d. Climate Study Predicts Flood-prone Future For Major U.S. Cities  
More than 1,700 American cities and towns – including Boston, New York, Miami, New Orleans, San Francisco, Sacramento and Seattle – will have some 25% of their populations living below the high-water mark by the end of this century if the current global warming trend continues, a new climate change study has found. [The same danger, of course, exists for coastal cities around the world.]

<https://www.facebook.com/photo.php?fbid=635650816460294&set=gm.10151800730432402&type=1&theater>

<https://www.facebook.com/photo.php?fbid=578778172144617&set=a.410051592350610.85835.410048385684264&type=1&theater>

e. These 1,700 towns are locked into a flood-prone future by greenhouse gas emissions already built up in the atmosphere. The analysis published in the Proceedings of the National Academy of Sciences (PNAS) on Monday found that 79 cities and towns with a combined population of 835,000 would be staring down those waters by 2023. About half of the population of Fort Lauderdale, Hoboken, and Palm Beach, would be living below the high tide line by 2023.

**During a recent speech in Berlin, President Obama said, "This is the global threat of our time." What is that threat? A. More severe storms B. Famine and floods C. Coastlines that vanish D. Oceans that rise E. Climate change. sasrai ONLY THE PATH TO SAVE MOTHER PLANET EARTH, End Violence, HUNGER, DISASTER, CLIMATE Threat**

<http://pedestrianwitness.blogspot.com/2013/06/triump-of-sasrai-movement.html>

In China, Waste No Time in Stopping Waste. "Both at the individual and societal level, building a 'thrifty society' is a matter of ethics," explains WRI China Director LaiLai Li. "President Xi Jinping has urged Chinese people to 'build a thrifty society,' because if we persist with our business-as-usual production and consumption pattern we would invite a resource and environmental crisis."

No terrorist group capable to bring hazard for the Humanity equal to smallest flood, tornado, cyclone. So each government needs to be concerned Climate Change and sequences.

[http://www.huffingtonpost.com/2013/08/12/keystone-xl-protest\\_n\\_3744108.html](http://www.huffingtonpost.com/2013/08/12/keystone-xl-protest_n_3744108.html)

Extreme weather and climate events such as storms, floods, droughts and wildfires visibly impact not only our communities and livelihoods, but also our resources and related infrastructure. In its latest report, U.S. Energy Sector Vulnerabilities to Climate Change and Extreme Weather, the

U.S. Department of Energy (DOE) warns that domestic energy supplies are likely to face more severe disruptions given rising temperatures that result in extreme weather events.

<https://www.facebook.com/photo.php?fbid=532999326722502&set=a.410051592350610.85835.410048385684264&type=1&theater>

The report accurately outlines the risks climate change poses to the energy sector in the United States and serves as a wake-up call on this critical issue, which I highlighted in my testimony before the Energy and Power Subcommittee of the House Energy and Commerce Committee earlier this year.

Mounting Evidence: Climate Change Threatens America's Energy Sector  
Submitted by Jennifer Morgan on July 16, 2013

### **Current and Potential Future Impacts**

Building on the national [Climate Action Plan](#) released by President Obama last month, the DOE report assesses how recent weather events have impacted critical energy and electricity infrastructure across the country. In the last decade, three trends in extreme weather and climate have caused major disruptions to our nation's ability to produce, deliver and store energy: increasing air and water temperatures; decreasing water availability across regions and seasons; and increasing intensity and frequency of storms, flooding and sea level rise. These disruptions range from high-profile events such as the outages resulting from Hurricane Sandy to less-visible yet pervasive ones such as the drought last summer.

<https://www.facebook.com/photo.php?fbid=532999326722502&set=a.410051592350610.85835.410048385684264&type=1&theater>

### **Rising temperatures**

Increasing air and water temperatures fuel an increase in electricity demand for cooling, which in turn raises air conditioning costs. For example, a [study in Massachusetts](#) estimated that rising temperatures could increase demand for electricity in the state by 40 percent by 2030. More frequent and severe wildfires pose significant risk of physical damage to infrastructure – power lines, transformers, and electricity distribution systems.

<https://www.facebook.com/photo.php?fbid=532999326722502&set=a.410051592350610.85835.410048385684264&type=1&theater>

### **Scarcer water resources**

Decreasing water availability and increased surface water temperatures associated with lower flows affect cooling at thermoelectric power plants and reduces available generation capacity. This increases the risk of shutdowns at coal, natural gas and nuclear power plants. In addition, drought and declining snowpack affect the availability of hydroelectric power generation. Reductions in river levels also impede barge transport of hydrocarbons and coal, resulting in delivery delays and increased cost.

<https://www.facebook.com/photo.php?fbid=532999326722502&set=a.410051592350610.85835.410048385684264&type=1&theater>

**"The world is heading for irreversible and potential catastrophic climate change",**

The National Oceanic and Atmospheric Administration (NOAA) announced that 2012 was the hottest year on record for the United States. It was also the second most extreme, weather-wise, and nearly twice the average. NOAA confirmed that this pattern will worsen if climate change continues unabated.

Australia is baking under a record-breaking heat wave that is literally off the charts! The heat is so extreme that their Bureau of Meteorology had to add new colors to its weather chart to extend its previous maximum temperature range that had been capped at 50 degrees [122°F]!  
<http://ow.ly/gIatj>

IPS - Special Issue on COP18 Doha Climate Change Conference 29 Nov, Dec 07, 2012 - state that unsustainable human consumption and production systems are driving changes in average temperatures and weather patterns, "abnormal" is increasingly becoming the norm.

Since 2004 sasrai urging to all, every day to reverse the devastating trend of **Climate Change**. Central cause of Climate Threat is our Consumption - that breeds unsustainable production - and that breeds Hotter World and that is Hungry World, disastrous world. If we feel the need of Warning Free World for our next generation we must have bridle on our consumption. And since 2004 sasrai appeal for that - '**HOW MUCH LESS CONSUMING I COULD BE.**' In absence of sasrai feeling, thinking and practice we can't offer a habitable earth for our next generation.

- Due to Global Warming, End Is Virtually Certain for NYC, Boston, Miami, Holland  
[http://www.huffingtonpost.com/eric-zuesse/dueto-global-warming-end\\_b\\_3628981.html?ir=Miami](http://www.huffingtonpost.com/eric-zuesse/dueto-global-warming-end_b_3628981.html?ir=Miami)
- To end the poverty, hunger, disaster, climatic threat - start reducing global warming. And sasrai is only the path.

Absolute truth for today's world careless consumption driving untenable production that driving changes in temperature and weather patterns and that's the Hotter and Hungry World. Hungry world will contribute millions of desperate people. Desperate people do desperate things: **They riot, they fight over food, they overthrow governments, and the mass migrate to food-secure countries.**

<https://www.facebook.com/photo.php?fbid=616743691681398&set=a.410051592350610.85835.410048385684264&type=1&theater>

IPCC 5th Assessment Report urges- disrupted climate can do in sea level rise and acidification, aggravated droughts and wildfires, increased storm severity and flooding. Those impacts will grow more severe unless we start reducing global warming pollution, not tomorrow, but now.

<https://www.facebook.com/photo.php?fbid=616743691681398&set=a.410051592350610.85835.410048385684264&type=1&theater>

READ the full IPCC report here: <http://www.ipcc.ch/report/ar5/wg1/#.UkWVU7x55ww>

THE HEAT IS ON, FOR SURE, SAYS IPCC, URGES ACTION NOW. What's that action? First of all need significant change in mindset **save a bit, reserve, preserve, rejuvenate and conserve resources.** As pollution from human activities is changing the Earth's climate, we see the damage that a disrupted climate can do in sea level rise and acidification, aggravated droughts and wildfires, increased storm severity and flooding. Those impacts will grow more severe unless we start reducing global warming pollution, not tomorrow, but now.

<https://www.facebook.com/photo.php?fbid=616743691681398&set=a.410051592350610.85835.410048385684264&type=1&theater>

The impact of food waste is not just financial. Environmentally, food waste leads to wasteful use of chemicals such as fertilizers and pesticides; more fuel used for transportation; and more rotting food, creating more methane – one of the most harmful greenhouse gases that contributes to climate change. Methane is 23 times more potent than CO2 as a greenhouse gas. The vast amount of food going to landfills makes a significant contribution to global warming.

- Roughly one third of the food produced in the world for human consumption every year — approximately 1.3 billion tonnes — gets lost or wasted.

- Every year, consumers in rich countries waste almost as much food (222 million tonnes) as the entire net food production of sub-Saharan Africa (230 million tonnes).
- The amount of food lost or wasted every year is equivalent to more than half of the world's annual cereals crop (2.3 billion tonnes in 2009/2010).
- Food loss and waste also amount to a major squandering of resources, including water, land, energy, labour and capital and needlessly produce greenhouse gas emissions, contributing to global warming and climate change.
- In developing countries food waste and losses occur mainly at early stages of the food value chain and can be traced back to financial, managerial and technical constraints in harvesting techniques as well as storage –and cooling facilities. Thus, a strengthening of the supply chain through the support farmers and investments in infrastructure, transportation, as well as in an expansion of the food –and packaging industry could help to reduce the amount of food loss and waste.
- In medium- and high-income countries food is wasted and lost mainly at later stages in the supply chain. Differing from the situation in developing countries, the behavior of consumers plays a huge part in industrialized countries. Moreover, the study identified a lacking coordination between actors in the supply chain as a contributing factor. Farmer-buyer agreements can be helpful to increase the level of coordination. Additionally, raising awareness among industries, retailers and consumers as well as finding beneficial use for save food that is presently thrown away are useful measures to decrease the amount of losses and waste.
- In the United States 30% of all food, worth US\$48.3 billion (€32.5 billion), is thrown away each year. It is estimated that about half of the water used to produce this food also goes to waste, since agriculture is the largest human use of water. (Jones, 2004 cited in Lundqvist et al., 2008)
- United Kingdom households waste an estimated 6.7 million tonnes of food every year, around one third of the 21.7 million tonnes purchased. This means that approximately 32% of all food purchased per year is not eaten. Most of this (5.9 million tonnes or 88%) is currently collected by local authorities. Most of the food waste (4.1 million tonnes or 61%) is avoidable and could have been eaten had it been better managed (WRAP, 2008; Knight and Davis, 2007).
- In the USA, organic waste is the second highest component of landfills, which are the largest source of methane emissions.

#### **Sources:**

Global Food Losses and Food Waste - FAO, 2011

The environmental crisis: The environment's role in averting future food crisis – UNEP, 2009

<http://www.unep.org/wed/quickfacts/#sthash.jztpa00A.dpuf>

*"The world is heading for irreversible and potential catastrophic climate change",  
Central cause of Climate Threat is our Consumption - that breeds unsustainable production -  
and that breeds Hotter World and that is Hungry World. If we feel the need of Warning  
Free World for our next generation we must have bridle on our consumption. And since  
2004 sasrai appeal for that - 'HOW MUCH LESS CONSUMING I COULD BE.' In absence  
of sasrai feeling, thinking and practice we can't offer a habitable earth for our next  
generation.*

#### **The relation between consumption and water use**

"The interest in the water footprint is rooted in the recognition that human impacts on freshwater systems can ultimately be linked to human consumption, and that issues like water shortages

and pollution can be better understood and addressed by considering production and supply chains as a whole," says Professor Arjen Y. Hoekstra, creator of the water footprint concept.

"Water problems are often closely tied to the structure of the global economy. Many countries have significantly externalized their water footprint, importing water-intensive goods from elsewhere. This puts pressure on the water resources in the exporting regions, where too often mechanisms for wise water governance and conservation are lacking. Not only governments, but also consumers, businesses and civil society communities can play a role in achieving a better management of water resources."

### Some facts and figures

- The production of one kilogram of **beef** requires 15 thousand litres of water (93% green, 4% blue, 3% grey water footprint). There is a huge variation around this global average. The precise footprint of a piece of beef depends on factors such as the type of production system and the composition and origin of the feed of the cow.
- The water footprint of a 150-gram **soy burger** produced in the Netherlands is about 160 litres. A beef burger from the same country costs about 1000 litres.
- The water footprint of **Chinese consumption** is about 1070 cubic meter per year per capita. About 10% of the Chinese water footprint falls outside China.
- **Japan** with a footprint of 1380 cubic meter per year per capita, has about 77% of its total water footprint outside the borders of the country.
- The water footprint of **US citizens** is 2840 cubic meter per year per capita. About 20% of this water footprint is external. The largest external water footprint of US consumption lies in the Yangtze river basin, China.
- The **global water footprint** in the period 1996-2005 was 9087 Gm<sup>3</sup>/yr (74% green, 11% blue, 15% grey). Agricultural production contributes 92% to this total footprint.
- **Water scarcity** affects over 2.7 billion people for at least one month each year.

We can see climate change impacting communities around the world. But can you see how we're all paying for it? On October 22-23, artists, scientists, and world leaders will come together during 24 Hours of Reality: The Cost of Carbon to explore how we're paying the cost of carbon in everything from taxes to grocery bills—and what we can do about it. Subscribe to reminders at <http://bit.ly/costofcarbon>, mark your calendar, set an alarm—just be sure to remember. Because we're bringing the world together to solve climate change and you won't want to miss it.

<https://www.facebook.com/photo.php?fbid=576803459052969&set=a.202486859817966.50855.153278754738777&type=1&theater>

### Climate Change And Violence Linked, Breakthrough Study Finds

[http://www.huffingtonpost.com/2013/08/01/climate-change-and-violence\\_n\\_3692023.html?ir=Green&utm\\_campaign=080213&utm\\_medium=email&utm\\_source=Alert-green&utm\\_content=Title](http://www.huffingtonpost.com/2013/08/01/climate-change-and-violence_n_3692023.html?ir=Green&utm_campaign=080213&utm_medium=email&utm_source=Alert-green&utm_content=Title)

Shifts in climate change are strongly linked to human violence around the world, according to a comprehensive new study released Thursday by the University of California, Berkeley and Princeton University. The research, which was published in *Science*, examined 60 previous studies from all major regions of the globe. The results suggest that changes such as drought, flood and high temperatures strongly correlate with spikes in conflict. Researchers noted examples including increased domestic violence in India and Australia, assaults and murders in the United States and Tanzania, ethnic violence in Europe and South Asia, land invasions in Brazil, police violence in the Netherlands and civil conflicts throughout the tropics.

<https://www.facebook.com/photo.php?fbid=53299326722502&set=a.410051592350610.85835.410048385684264&type=1&theater>  
**The biggest culprit: higher temperatures. Out of 27 modern societies studied, all 27 showed a positive relationship between higher temperatures and violence.**

Through coverage of issues like food security, extractive industries, biodiversity and climate change, IPS aims to give a voice to people whose stories are seldom heard. IPS also hopes to highlight the various challenges they face in this globalised world: health and food insecurity, environment degradation, and poverty. Tourism, agriculture, fishing, the water supply – climate change threatens the very foundations of society and the economy in Mauritius. As the Indian Ocean island nation develops its adaptation strategies, it is working to ground the next generation of citizens firmly in principles of sustainable development.

SOMEONE TRYING TO BE SUPER/over MUSLIM IN FACT THEY ARE RELIGION TRADER. ARE U MUSLIM? HAVE IMAN? NEEDED NOT TO BOTHER/PUBLICIZE WHO SAYS/SAID/TOLD WHAT. I AM AN IMANDAR I DON'T BOTHER FOR OTHERS COMMENT. IN BANGLADESH SOME PEOPLE TRY TO BE MORE MUSLIM DISSEMINATING THIS SORTS OF POSTER/MESSAGE. IN FACT THEY NEVER FOLLW ISLAM IN PERSONAL LIFE. THEY DO BUSINESS IN THE NAME OF RELIGION. IMANDER NEED NOT CONSIDER WHICH SCIENTIST, ASTRONAUT, WRITER, PASTOR TOLD WHAT ABOUT PROPHET (PBUH) OR QURAN OR ALLAH.

## **The Global Commission on the Economy and Climate**

One of the most urgent challenges facing countries across the world today is how to achieve economic prosperity and development while also combating climate change.

**The Global Commission on the Economy and Climate**, and its flagship project, **The New Climate Economy**, have been set up to help governments, businesses and society make better-informed decisions on these crucial issues.

The Commission brings together expert research institutes from five continents, overseen by an International Council comprising former heads of government and finance ministers and leaders in the fields of economics, business and finance.

Reporting in September 2014, the project will make recommendations on the policies that can simultaneously deliver better economic growth and address the risks posed by climate change.

## **Eid Mubarak** **Peaceful and Prosperous Eid for all**

We must get Each Child Caring to Each Particle of Food, Resources

Please, save a drop of water daily, during all water related activities

- Please, plant at least a Native tree annually at own home or community
- Please, let's waste not single particle of food
- Please, let's waste not single particle of any resource
- Please, keep off electric appliances one minute daily
- Please, suspend travel by personal car once a day
- Please, keep a day in a week luxury free
- Please, do not throw away the waste wherever you like
- Please, No more junk food
- Please, Buy items made from recycled materials

Let's we try to save one Taka/dollar/pound/yen .....from our daily use, consumption, expenditure, LUXURY combat the CLIMATE CHANGE, GLOBAL WARMING and the sequences.

<http://www.facebook.com/sasraiMovement.2004>

"We must accept finite disappointment, but we must never lose infinite hope." Martin Luther King, Jr.

**Nature Rebellious** - Look at repeated threat from Nature - Australia, Africa, New Zealand, Myanmar, Brazil, Pakistan, Japan, Thailand, Europe, USA and Indonesia. To ensure Rights for all "save a bit, reserve, preserve, conserve resources". Let's achieve significant change in mindset, behavior and attitude combat Climate Crisis, Reduce Risk & Poverty, save Bio-diversity - Peace for Humanity. Nature never care super power or poorer, never follow any dictation from any Power Holder or Power Seeker - let's have care to the nature and be caring to the nature carefully, purposefully.

**Alexander Pope, 1688-1744.**

### **ODE ON SOLITUDE**

Happy the man, whose wish and care

A few paternal acres bound,

In his own ground.

Whose herds with milk, whose fields with bread,

Whose flocks supply him with attire,

Whose trees in summer yield him shade,

In winter fire.

Blest, who can unconcern'dly find

Hours, days, and years slide soft away,

In health of body, peace of mind,

Quiet by day,

Sound sleep by night; study and ease,

Together mixt; sweet recreation;

And innocence, which most does please

With meditation.

Thus let me live, unseen, unknown,  
Thus unlamented let me die,  
Steal from the world, and not a stone  
Tell where I lie.

Extreme events are wreaking havoc on people's lives and livelihoods in the United States. Communities across the country have endured severe storms, record-breaking temperatures, droughts and flooding - in what appears to be an alarming upward trend in the frequency and intensity of extreme weather. NOAA has already tallied 10 disasters through August 2011, each causing more than a billion dollars worth of damage. What about the other and specially our developing country.

Nature never be bothered super power or poorer - demand absolute Care  
[www.facebook.com/sasraiMovement.2004](http://www.facebook.com/sasraiMovement.2004)

**Nature Rebellious** - Look at repeated threat from Nature - Australia, Africa, NewZealand, Brazil, Pakistan, Japan, Indonesia, Myanmar, Thailand and USA.

Nature never bother super power or poorer - demand absolute Care

While saving a gallon here and there may not seem like much; bear in mind that every small action when multiplied millions of times can make a huge impact. For example, if every person in America reduced consumption by 100 gallons per year, and it's not that hard to do - that would represent a saving of nearly 30 billion gallons of water annually. If everyone in the USA did the same that would translate to over 300 billion gallons! We really undervalue water when you consider humans can go for weeks without food, but only days without water. The amazing thing is, we only need a few litres (a gallon or so) a day through our food and directly to sustain ourselves. Added that, to maintain hygiene, we only need about 25 litres (6 gallons) a day in total. In developed countries, we currently use 500-800 litres (125 to 200 gallons) per day per person!

Since 2003 sasrai-Movement volunteer urging global village needs to use each resources more efficiently

sasrai urges to all - `be environment friendly- sustainable consuming, Eco-efficient.'

sasrai urge - live simple let other live simply - Nature caring global community

Let the world know that children and young people are partners in reducing disaster risk. Live simple that other could simply live - we need nature caring global community.

Humanity is driving Earth's climate and ecosystems towards dangerous tipping points, requiring radical new forms of international cooperation and governance, experts say. "We're facing a planetary emergency," said Owen Gaffney of the International Geosphere-Biosphere Programme based in Stockholm.

<http://sasrai.blogspot.com/2012/01/rio20-moment-when-everything-changed-by.html>

This is a terrific message for global community definitely for the power holder and property holder or money maker. People are getting frustrated and pessimistic observing the total situation of the globe - where poverty is increasing and climate threatening incessantly. Mass people are in highest most threat of survival. Let's we all be caring to each as maximum as possible.

"Man is still the greatest miracle and the greatest problem on this earth."  
David Sarnoff quotes (Russian born American Inventor pioneer in the development of both radio and television broadcasting. 1891-1971)

Only when the last tree has been cut down, Only when the last river has been  
poisoned,

Only when the last fish has been caught, Only then will you find that money cannot be eaten

Since 2003 sasrai-Movement volunteer urging global village needs to use each resource more efficiently

**sasrai urges to all - `be environment friendly- sustainable consuming, Eco-efficient.'**

**sasrai urge - live simple let other live simply - Nature caring global community**

Let the world know that children and young people are partners in reducing disaster risk. Live simple that other could simply live - we need nature caring global community.

Humanity is driving Earth's climate and ecosystems towards dangerous tipping points, requiring radical new forms of international cooperation and governance, experts say. "We're facing a planetary emergency," said Owen Gaffney of the International Geosphere-Biosphere Program based in Stockholm.

<http://sasrai.blogspot.com/2012/01/rio20-moment-when-everything-changed-by.html>

Extreme events are wreaking havoc on people's lives and livelihoods-Let's have small SEEP Fund for Nature Care in each area across the Globe.

On 18<sup>th</sup> November 2011, the Intergovernmental Panel on Climate Change (IPCC) launched its 'Special Report on Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation' (SREX).

The findings were approved by 194 governments following a four-day meeting in Kampala, Uganda in which the Report's Summary for Policy Makers was agreed line by line. Written over two and a half years by over 200 hundred authors, reviewed by many hundreds more and involving academics, practitioners and policy makers from Fiji to Senegal and from Russia to Chile, the report presents a dramatic and precise set of findings.

**Dear Friends**

Today's generation of youth — the largest in history — has the power to change the world, but many of the more than 600 million adolescent girls living in developing countries won't even get the chance to go to school. This is one of the many reasons the UN Foundation started the Girl Up campaign.

Danielle Nierenberg

NEED YOUR THOUGHTS: What is the biggest obstacle to a sustainable food system?

Dear Danielle Nierenberg

sasrai-Movement trying to popularize this highly desired thought/action among all emphasizing School Children. Our observation this is very effective. But we must remember that bringing behavioral and

attitudinal change will take time. We highlight the Food & Water but propose for each and every particle of any resource. We also believe Voice should be raised from each corner of the globe that needs partnership among the like minded individual, institution and organization.

<http://www.facebook.com/sasraiMovement.2004>

So let's make this sasrai-Movement way of life for future generations who haven't committed any sinful act. Let's Aim to make more Doers than Beneficiaries, then only we can make this planet Earth better and better. Let's make my nation Awakened, Educated, Clean, Green, Healthy, Sustainable, Prosperous and Happy & make this Planet Earth a better place to live in.

Typhoon Haiyan, one of the strongest recorded storms in history, touched ground on Friday, devastating entire towns in the island nation, including the cities of Basesy and Tacloban, where thousands are missing and officials say the death toll could reach 10,000. According to the UN, more than 600,000 displaced residents across the country are in desperate need of food, water, and medicine.
